

SEO for Google Based Mobile Phone

With the pre-sales reaching 1.5 million of the Android-based G1 from T-Mobile, website owners can increase their traffic by undertaking the following:

Action Point #1: Comply with Android Based Browser

Android is a software stack for mobile devices that includes an operating system, middleware and key applications. As the beta version of the [Android SDK](#) provides the tools and APIs, developers have can now begin to develop applications on the Android platform using the Java programming language.

Action #2: Facebook is Pre-Loaded

Facebook is pre-loaded into the Android-based G1 from T-Mobile phone. Developers that are practising search engine optimization using Facebook should review their implementations and ensure that it is compatible with the Android-based G1 from T-Mobile phone.
